2025 (F)

Liv Business

- World's first female dedicated cycling
- 2023Y at 9% of group sales
- 2024Y sales decline low single digit but reach to 10% of group sales

2024Y increase double digit and over 5% group sales

M I D - T E R M

Medium-and Long-Term Plan

Focusing on Innovation and Sustainability, and Responding Quickly to Market Trends and Feedback.

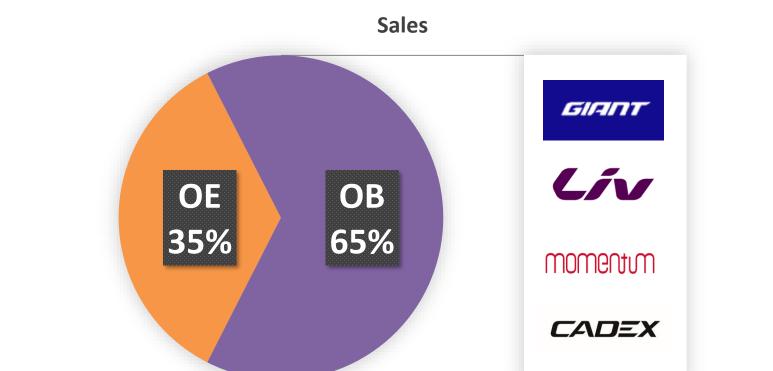

Why Giant Group different

Advancing the entire cycling world

Global Engineering procedures

CUTTING-EDGE COMPOSITE MATERIAL

All-new Professional Grade raw carbon material is woven in Giant's own composite factory to produce an even lighter, stiffer frameset than the previous generation. This material also uses Carbon Nanotube Technology resin to improve impact resistance.

LASER CUTTING

Whereas previous generations of TCR frames relied on machine-stamped composite swatches, new laser technology is now used to produce ultra-precise cuts. This translates into smaller, more exacting swatches, which results in lighter overall weight of the finished structure.

ADVANCED ROBOTIC LAYUP ASSEMBLY

Giant Manufacturing invested in a new robotic assembly process for the critically weight conscious areas of the frame and fork. Ultra-precise placement of 150 smaller, individual composite swatches results in lighter overall frame and fork weights.

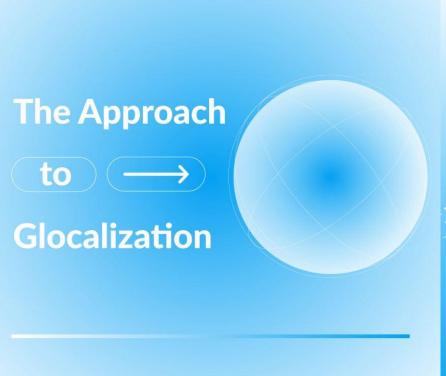

FINISHING TECH

Our new ThinLine paint process on the TCR Advanced SL 0 Disc uses a minimum quantity of paint to save up to 50 grams compared to a traditional seven-layer paint application. In addition, a proprietary 3M adhesive protector is used to reinforce the integrated seatpost (ISP) when the saddle clamp is installed, saving more weight without sacrificing security.

We currently have 15 wholly-owned sales companies.

Giant Group Hungary Manufacturing mainly supports the European market.)

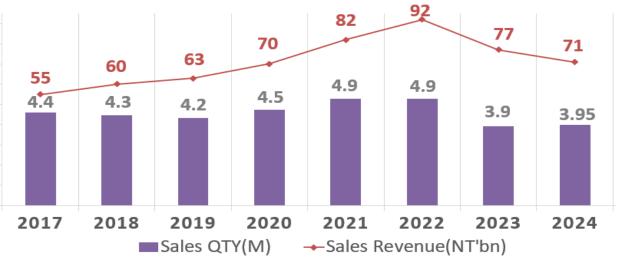

Giant Group Vietnam Manufacturing supports the American market.

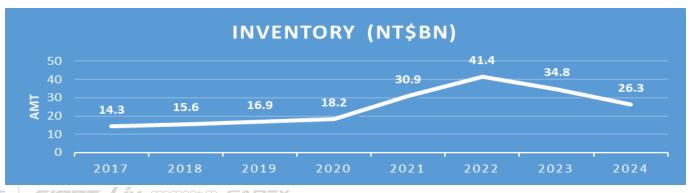

Sales performance

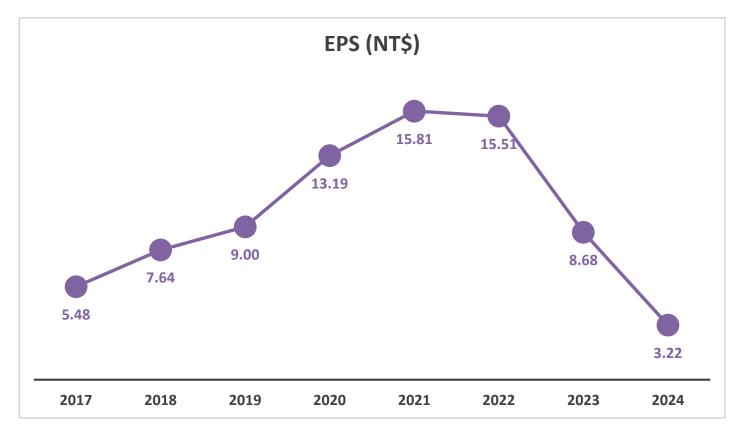

SALES REVENUE & QTY

Sales Quantity in China grew from less than 1 million units in 2019 to 2.3 million units by 2024.

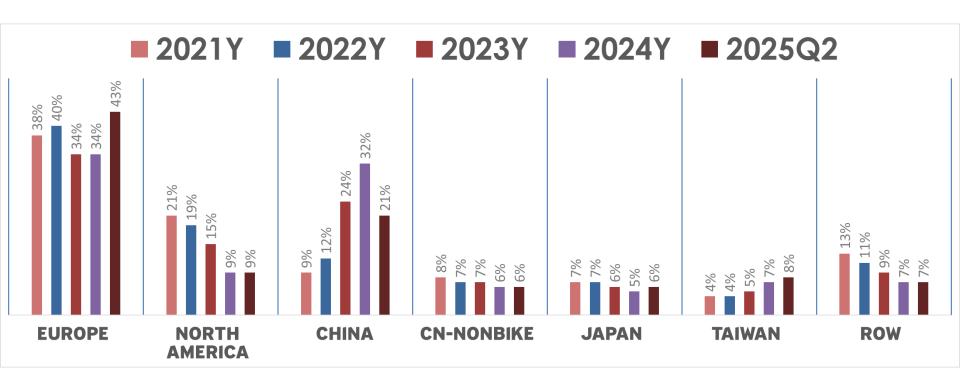

2023 inventory write-down of NTD 1.29 billion, impacting EPS by -2.43 2024 inventory write-down of NTD 1.91 billion, impacting EPS by -3.61 $\,$

Sales by Region

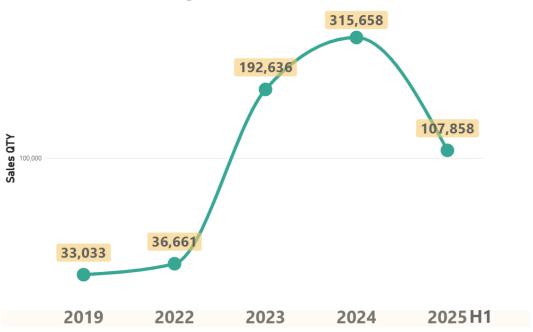

China upgrade trend

Market Update

Current Market Update

Europe

- Destocking progress is nearing end.
- Small improvements in the EU and look forward to the new model sales.
- US
 - > Tariffs are affecting consumer demand.
 - Dealers are conservative.
- **CN**
 - Sales slowdown based on high base.
 - Positive trend for cycling sport in long term.

Overall

Tariff terms are clearer, but execution risks remain and recovery timing is uncertain.

Announcement of 2024 ESG Report

- 28.48% GHG reduction 6 years ahead of 2030
- 2,806 tCO₂e saved through green product innovation
- 36.97% women in STEM above global benchmarks
- 36% female board representation diverse leadership
- First bicycle company in DJSI Emerging Markets Index

Cycling for a better future

STRATEGY PILLARS

Innovating a clean future

We are leading the charge towards reduced carbon emissions in our production practices. We reinvent how we work with manufacturing partners and invest in R&D to reduce our environmental impact for future generations.

Transforming for circularity

We are implementing positive changes in our value chain from our suppliers to our customers. We constantly strive for more sustainable materials and processes.

Mobilizing for DEI

We are mobilizing people to advance inclusive communities. We promote accessibility and collaboration in the workplace to allow diverse ideas to flourish.

REDUCE RESOURCE INEFFICIENCIES

he resources on our shared planet are finite, et we continue to deplete them. Wasteful ways f production and consumption are no longer an otion.

How might we reduce resource inefficience in our value chain to impact our consumers' connected base?

BREAK DOWN SOCIAL BARRIERS

Despite our increasingly globalized world, then as been a trend towards polarization and livision. Inequality and social injustice remain i ur communities.

create a more inclusive environment, internal and for our consumers?

Total of 52 Product Ranges Have Applied Eco-Friendly Materials

Recycled Carbon Fiber (rCF)

The world's first ecofriendly push bike

Recycled Nylon From discarded fishing nets
